

Choosing inserts

Planners are great things ONCE you figure out which inserts work best for you and how to make those inserts work for you. In this episode, the gruesome twosome tackle the gruelling subject of selecting proper inserts, discussing various types, sizes, layouts, paper quality and thickness.

We also discuss whether printing your own inserts is the way to go, particularly when comparing the price of paper and printer ink versus having custom inserts printed and what type of printers are the best for handling insert projects.
